

DOMINION accelerates its environmental project with its third acquisition of the year

- **The company strengthens its environmental project, Global Dominion Environment (GDE), and advances its goal of consolidating its position as a key player in industrial environmental management in Europe.**
- **With the acquisition of Ecogestión de Residuos S.L., it makes its third acquisition in 2025.**

[Bilbao, September 9, 2025]

2025 is proving to be a decisive year for DOMINION in its environmental commitment. Following the acquisition of two companies —one specialising in the circular economy and the other in decarbonisation— so far this year, the company has now added its third strategic operation with the acquisition of 100% of **Ecogestión de Residuos S.L.**, based in Arcos de la Frontera (Cádiz). This incorporation strengthens its presence in a key industrial hub in southern Spain and consolidates Global Dominion Environment's roadmap.

Ecogestión de Residuos is a company with more than two decades of experience in integrated management and transfer of industrial waste, generating EBITDA of almost €1 million and with a strong client portfolio that includes both SMEs and large corporations. Its acquisition **strengthens DOMINION's presence in a strategic industrial hub in southern Spain.**

This operation expands the capacity of its **Global Dominion Environment (GDE)** area to offer integrated solutions in the field of the **circular economy**. It also generates operational synergies with the environmental **waste management infrastructures** that DOMINION already has in southern Spain, optimising processes and strengthening its value proposition for industrial customers.

With this new addition, and with its sights set on becoming a European benchmark in environmental management, DOMINION is moving forward in the **consolidation of a still fragmented sector**, in which European regulation and growing demand for sustainable solutions are accelerating the transition towards **more efficient and circular production models.**

"2025 is a pivotal year for us. This acquisition is our third one this year in the environmental field and reflects our commitment to a more sustainable industry, helping our customers meet their environmental goals and reduce their carbon footprint without compromising their competitiveness. We are proud to welcome Ecogestión de Residuos to GDE, and it will certainly strengthen our position as a leading partner in Europe in environmental management," said DOMINION.

With these three strategic operations in less than a year, DOMINION confirms its execution capacity and moves **towards its goal of Global Dominion Environment reaching €500 million in turnover by 2025**, consolidating its role as a European benchmark in the circular economy and industrial decarbonization.

About [DOMINION](#)

Dominion is a global projects and services company that drives the transformation of key sectors towards more sustainable, efficient and connected models.

Organized in two main strategic areas: GDE, specialized in environmental solutions, circular economy and decarbonization; and GDT, focused on energy, telecommunications and digitalization infrastructures.

Through our strategic areas we accompany our clients in the main transitions facing our society: energy, industrial and socio-digital.

Founded in Bilbao in 1999, Dominion has its own management model based on four keys: Digitalization, Diversification, Decentralization and Financial Discipline. With a presence in more than 35 countries, more than 750 clients and a team of more than 10,000 people, we achieve a turnover of more than €1.1 billion per year and have been listed on the Spanish Stock Exchange since April 2016 (DOM: BME).

Technology, Sustainability & Efficiency.
